Chapter 1

Text Layout

1.1 Tabulators

1.1.1 tabto

```
\usepackage{tabto}
```

• • •

left \tab right

produces:

left

right

1.2 paragraph

- can be done by making an empty line:

bla bla

bla bla

1st paragraph. alalala alalala alalala lalalala lalalalala alalalal alalala alalala
alalala alalal alalala .

2nd paragraph alalala alalala alalala alalala alalala

1.3 arguments

Two types:

- **mandatory**
 - enclosed within a pair of **curly brackets**.

– each argument is between a separate pair of brackets.

- **optional**
all enclosed within a pair of **single pair of square brackets**.

1.4 An Empty Space after no-arg Commands

No-arg commands 'consume' empty spaces that follow. to avoid it"

- add empty argument list - {}, or
- put inside curly brackets

```
\LaTeX{} {\LaTeX} \LaTeX
```

outputs:

```
LATEX LATEX LATEX,
```

```
\LaTeX \LaTeX
```

outputs no space between:

```
LATEXLATEX
```

1.5 Special Characters

- | | |
|------|-----------------------------|
| • # | <code>\#</code> |
| • \$ | <code>\\$</code> |
| • % | <code>\%</code> |
| • ^ | <code>\^ { }</code> |

2.1 quote

```
\begin{quote}
  This is a quote. This is a quote. This is a quote. This is a quote. ...
  This is a quote. This is a quote. This is a quote. This is a quote.
\end{quote}
```

... adds extra space to both margins:

A quote follows:

```

  This is a quote. This is a quote. This is a quote. This is a quote.
  This is a quote. This is a quote. This is a quote. This is a quote.
  This is a quote. This is a quote. This is a quote. This is a quote.
  This is a quote. This is a quote. This is a quote.
